

Table of Contents

Forward	iii
List of Participants	v
Session I: Hyperon Physics and CP Violation – Theory	1
Challenges in Hyperon Decays	3
D. Chang, NTHU	
Status of CP Violation Hyperon Nonleptonic Violation	15
G. Valencia, ISU	
Session II: Hyperon Physics and CP Violation – Experiment	23
The Importance of Future Hyperon Beta Decay Experiments	25
N. Solomey, IIT	
Session III: Resonance and Charmonium Studies	35
Challenges and Opportunities in Antiproton Physics in the Charmonium Region	37
K. Seth, NWU	
Light-Quark Spectroscopy with $\bar{p}p$ Annihilation	47
U. Weidner, Uppsala	
Multi-GeV Gluonic Mesons	55
P. Page, LANL	
Session IV: New Machines	65
Antiprotons at the Future GSI Facility	67
W. Henning, GSI	
Accelerator Possibilities for Low Energy Antiprotons at Fermilab	75
G. Jackson, Fermilab	
The Proton Driver at Fermilab	85
W. Chou and C. Ankenbrandt, Fermilab	
Session V: Physics with Trapped \bar{p} 's	89
Physics with Ultralow-Energy Antiprotons	91
M. Holzscheiter, LANL	

An Antihydrogen Interferometer for Measuring Antimatter Gravity	109
T. Phillips, Duke	
Working Group Summaries	117
Towards a Hyperon “Super-CP” Experiment	119
D. Kaplan, IIT
